What is DTG?

Direct-to-garment printing (DTG) is a process of printing directly onto a Garment with ink. DTG printers typically have a platen designed to hold the garment in a fixed position, and the printer inks are jetted or sprayed onto the textile by the print head. DTG typically requires that the garment be pre-treated with a PTM or Pre-treatment machine allowing for the following:

- Stronger bond between garment fibers and the pigmented inks
- Lays down loose fibers to provide for a smoother substrate
- Chemically reacts with the inks to promote drying and curing

Since this is a digital process the print is sharper and has a higher resolution, or DPI, than traditional printing methods such as screen printing.

DTG is best suited for Light Garments.

What is DTF?

Direct to Film or DTF is a process that transfers prints onto fabric or other substrates using a heat-press mechanism. Unlike the DTG method, which only works on cotton fabrics, the Printer DTF method can work on cotton and poly blends.

Turnaround time

Printing

The turnaround time on your order with Print starts when:

- You've paid the order in full.
- We have all the information required to complete your order (all artwork in printable format, preferably dpi300)

Delay in receipt of any of this information could result in production delays. Our current turnaround time is 7-12 business days. Complex orders/add-ons may increase turnaround time. Delay in approval of mock ups could also result in production delays. Each finishing service (printed tags, etc.) will add extra time to turnaround on orders, adding roughly 1-2 days to the turnaround time.

Blank Stock

Blank stock orders also have a lead time of 5-7 days from payment received if we need to add items that we do not have in stock at the warehouse.

*Discount is applicable to bulk orders.
